## How to:

# Clear balls on Stern Pinball

5. Once into Test, activate the ball trough solenoid by pressing the 'Menu' button. This should prompt the machine to eject a ball into the launch lane and the machine should automatically shoot it into the playfield.

6. As the balls come down the playfield, pick them up and place in a secure location. Once all balls have been ejected from trough, it is safe to lift your playfield or move your pinball machine.
